Webinar Invitation: Optimising Compliance Under the EU's New Emissions Regime

The EU has set ambitious targets to reduce greenhouse gas emissions from shipping by 40% by 2030 and achieve net-zero emissions from this sector by 2050. To achieve this goal, a series of new regulations are being implemented, starting from 2024. Known as Europe's 'Fit for 55' package, this proposal includes the EU Emissions Trading Scheme (ETS) and FuelEU Maritime regulations.

With this in mind, LR are hosting an online webinar to discuss how to optimise compliance with these new regulations. The webinar will cover:

- An overview of the new EU regulations affecting shipping from 2024 onwards.
- The impact of these regulations on maritime stakeholders, including shipowners, operators, charterers and port authorities.
- Advice on what maritime stakeholders can do to optimise their compliance in the face of these new regulations.
- Live Q&A panel session.

Webinar Date:

Wednesday 7th February

Webinar Times:

9:00am UK (GMT/UTC) 5:00pm China (UTC+8)

3:00pm UK (GMT/UTC) 9:00am USA (UTC-6)

This webinar is designed for maritime stakeholders from all sectors, including shipowners, operators, charterers and port authorities.
